MAKERS OF THE WORLD'S BEST
BAMBOO SPOUT & PUMP KITS

OUR COMPANY VALUES

CREATING THE BEST BAMBOO WATER SPOUT & PUMP KITS

SUSTAINABILITY AND ARTISANSHIP

We responsibly source solid bamboo through sustainable harvesting practices, skillfully transforming it into functional and captivating bamboo water fountains.

A COMMITMENT TO CRAFT

Our artisan-crafted water fountains highlight the resilience of split-resistant Vietnamese bamboo. Many of our dedicated craftsmen and women have been an integral part of our journey since the 90s, infusing each creation with a sincere labor of love.

TIMELESS ELEGANCE INSPIRED BY NATURE

Embraced by DIY gardening enthusiasts, our bamboo water fountains remain a lasting choice for those who appreciate the timeless charm of bamboo.

ADJUSTABLE (HALF-ROUNDS) SPOUT & PUMP KITS

Our adjustable fountains include the spout & pump, and can be used with a container or bowl of your choice. They can be raised or lowered to create different sound qualities.

7" ADJUSTABLE - HALF-ROUNDS

Product #10010

The flat bamboo base gives this style greater stability. Use this size in the garden, patio or as an indoor accent. The small size of this fountain makes it easier to run in the background without drawing too much attention.

12" ADJUSTABLE - HALF-ROUNDS

Product #10020

The 12" Adjustable also features the flat-style base for added stability. Use this size in a wide range of garden containers.

HOW TO ADJUST THE HEIGHT OF THE ADJUSTABLE SPOUT

You can easily adjust the support arms to raise or lower the height of the fountain. The 7" and 12" sizes of the half-round style adjust by inserting a wedge to secure the support piece. For the 12" and 18" sizes of the branch arm style, slide the black string outward, adjust the position, then slide the strings toward the center to lock into place.

Adjustable Spout
(Half-Rounds)

Adjustable Spout
(Branch Arms)

ADJUSTABLE (BRANCH ARMS) SPOUT & PUMP KITS

Our first bamboo spout design - the original. This small sized, stylish branch arm design is similar to the half round design and function, but has what many consider to be a better aesthetic. Try both types of adjustable styles to see which one customers choose.

7" ADJUSTABLE - BRANCH ARMS

Product #10017

This smaller size works well indoors or outdoors. Directing the water flow onto a bed of rocks or the side of the bowl creates an appealing sound.

12" ADJUSTABLE - BRANCH ARMS

Product #10027

Add this fountain to a birdbath or outdoor fountain to generate a lot of splash and sound.

18" ADJUSTABLE

Product #10030

This fountain features a wider upright pole, atop two delicate bamboo branches. Most people use this in an outdoor setting due to its larger size (and louder noise).

THREE-ARM SPOUT & PUMP KITS

Our Three-Arm fountain adds a subtle symphony to your home or garden. Its spout sits close to the water's surface, making it ideal for shallower containers and perfect for indoor or tabletop fountains.

7" THREE-ARM

Product #10205

This low-lying little fountain is perfect for small, shallow pots. It's a favorite for desktop fountains and small outdoor accents.

12" THREE-ARM

Product #10200

Twelve inches seems to fit most popular container widths. The pleasing look, sound and proportion of this fountain make it one of our most popular items.

18" THREE-ARM

Product #10210

Our largest Three-Arm Fountain fits the widest containers sold by most garden centers, making it a popular choice for outdoor water features. Pair it with a deep, wide bowl to create a striking visual (and auditory) statement.

CLASSIC SPOUT & PUMP KITS

This Japanese-inspired fountain rests on the side of a bowl or basin. Its unique design is a best-of-both-worlds combination of our two most popular fountains: the low-lying 3-Arm Fountain and the sonorous water flow of the Adjustable Fountain

12" CLASSIC

Product #10100

This size works with a variety of basins and containers, giving you endless options for a sweet little outdoor water feature. We often see them nestled into a flower garden.

18" CLASSIC

Product #10110

Add this fountain to a birdbath or outdoor fountain to generate a lot of splash and sound.

WHAT SIZE SPOUT & CONTAINER?

Spout size refers to the horizontal length (the part that rests on the container) rather than the height. Since the spout should be placed on the edge of the container, the base does not need to fit across the center of the pot. This table will give you an idea of which spout size you will need for each range of container sizes. (applicable to all styles of Bamboo Accents' fountains)

SPOUT SIZE	DIAMETER BOWL
7"	6"-15"
12"	10"-18"
18"	15"-28"

4" TWO-ARM SPOUT & PUMP KITS

4" TWO-ARM

Product #10015

This cute little fountain kit is perfect for an office, living room, or reading nook. It makes a unique gift for anyone who could use a little natural stress relief. It also purifies the air and acts as a natural humidifier, benefitting your pets and plant. Add different sized stones to the reservoir to experiment with different sound qualities.

FIVE-ARM SPOUT & PUMP KITS

12" FIVE-ARM

Product #10220

This fountain would be perfect for a Zen garden or indoor spa. The asymmetry of the crossing bamboo branches creates a pleasing visual effect, and the wide, low spout produces a tranquil trickling sound without splashing.

12" ROCKING FOUNTAIN SPOUT & PUMP KITS

12" ROCKING FOUNTAIN

Product #11000

Translated as “deer-scarer”, the traditional shishi odoshi was designed to do just that - frighten deer and wild boar away from agriculture.

A wide bamboo spout is balanced across a smaller base, resting on its heavier end, while a smaller spout gently fills it with water. When the spout is full, it tips forward to dump out the water, then slowly rocks back to its starting position. This produces a soft clacking sound, which can sometimes scare animals away.

Rocking fountains produce a meditative combination of sound and movement - you could watch one for hours. They can also help keep the critters away from your garden.

12" ROCKING FOUNTAIN INSTALLATION TIPS

12" Rocking Fountain comes mounted to a base, making installation a breeze. Some customers remove the rear strike piece by unscrewing it from the bottom and replacing it with a large stone to replicate the “thud” of a classic “shishi odoshi”.

36" TRADITIONAL SPOUT & PUMP KITS

36" TRADITIONAL

Product #10050

Please order in units of 3 (3 pcs/box)

Our 36" built-in fountain combines an elemental need with an elegant aesthetic. It's designed to be buried in the ground for a natural, "disappearing" look, and can be placed near a freestanding basin or submerged, to create an in-ground water feature with a pond liner or container.

This fountain is definitely more of a project to set up than our other products, but the creative possibilities are endless.

SUBMERSIBLE PUMPS

All of our kits come with the appropriate submersible pump, but it is still good to have a selection available in your store. Often customers will want to design their own fountains or need a replacement pump for their existing water features. These pumps are reliable, quiet, and come with a one-year warranty.

50 GPH SUBMERSIBLE PUMP

Product #20005

70 GPH SUBMERSIBLE PUMP

Product #20000

185 GPH SUBMERSIBLE PUMP

Product #20035

PUMP FEATURES:

- Adjustable flow control
- 5 ft. long power cord
- Extremely quiet operation
- Engineered for long life
- Low energy consumption - 2 watts
- Great for use in small fountains
- Adaptor for 5/16" (8mm) inside diameter tubing included

ITEM #	FLOW RATE	# OF WIRE	MAX LIFT	DIMENSIONS (LxWxH)
#20005	50 GPH	2 WIRE	20"	1.5"x1.25"x1"
#20000	70 GPH	2 WIRE	25"	1.9"x1.7"x1.1"
#20035	185 GPH	3 WIRE	55"	2.8"x2"x2.3"

PUMP MAINTENANCE

Our pumps are very reliable, but proper maintenance is important. Be sure to keep enough water in the container to prevent the pump from running dry. If the pump makes noise or doesn't pump water, first try tapping it gently on the bottom of the pot or unplugging and re-plugging the electrical cord. If the pump starts to make a different sound, remove the front grill and use a toothbrush to gently clean the impeller. Some customers wrap their pump in a nylon stocking to filter debris and algae.
